National Height Safety & Access Solutions

Testimonial from Tyrone Stewart

I was first introduced to Dan by my business partner Richard Sheppard, on my return from a stint working for our company in the Middle East approximately 2 years ago mid 2010, & started working with Dan shortly after

Our company required help from Dan to enable us to reach our goals, & grow our business & take it to new heights, also to achieve our personal goals in life, which always seem so far away when your business life is not in order

Dan has taught us not to complicate things in business, but to keep things streamlined, when the business is streamlined things are much clearer, & the way forward much easier, this also has made my mind set clearer on how to achieve the goals we have set

We as a company had never had a sales person on our team, selling has always been left to myself & Richard, Dan found this incredible, he taught us that to improve on turnover & ebit you must have a sales person, we now have a sales person that Dan actually bought to our business, the amount of sales being generated now has gone up by around 30%

The laws of the Universe which Dan talks about a lot & which I was already a big believer in, does actually work, if you do good things & put positive thoughts out, positive things will happen, our team in our company that we have around us currently is the best team we have ever had, we also have a very good working atmosphere, this is all due to Dan's teaching

Dan also had us take a close look at our accounting, & showed us where we could make some considerable savings, we have now changed our accountant, again Dan bought this accounting company to us

The one thing that I really like about Dan is that you can also have a laugh & joke with him, for me personally that is very important, as this is in my nature

I would highly recommend to anybody to work with Dan to help pave the way forward in business & personal life, he is what he says a MENTOR

Signed

Tyrone Stewart
