

To whom it may concern,

As a startup business looking to get out to the market, I had a lot of challenges ahead of me. It was imperative that I not only had a strategy to make sure my business was ready to accept it's first client (and a system to follow), but that I also had a specific plan of action to make sure I could continue to scale my business, achieve growth, and ultimately long-term financial freedom.

That's where Dan came in.

Before working with Dan, I was in the MVP stage of my business and ready to start marketing my service to the public - or so I thought. I thought I had a great sales pitch, a great lead nurturing plan, and a way to convert these leads into sales.

The reality was that I had no real specific plan, no real structure, and this reflected in my struggles to convert my first sale.

I found Dan by chance - he was referred to me by an acquaintance who had undergone their own incredible business & wealth transformation working with Dan. To be honest, I didn't believe the hype at the time. How could one person have such an impact on one business? All I knew about 'business coaching' at the time was that there were many 'phonies' out there who don't have any real experience in the startup space and therefore I was not interested in engaging with one myself.

However, once this acquaintance of mine showed me the results... I just had to engage with Dan.

From our first meeting, Dan's showed a thorough understanding of my current position and I could tell he was the guy to help. Our discussion reflected his incredible business knowledge, but I could see there was more to his program than just "let me help you with your business."

Dan and The Quantum Leap Program took me on an incredible journey, evaluating and improving my business, my leadership skills, and my wealth plan every step of the way. It's an experience I'll never forget.

I finally had a proper business plan and a strategy behind my marketing, my sales, and my client management. In addition to this, I closed my first sale within months of commencing Dan's program.

To take this further, Dan helped me build leadership skills that came into play the moment I needed to make my first hire - roughly 12 months in.

But most importantly, it's the wealth component of Dan's mentoring that has allowed me to build not only a sustainable business, but the financially free and secure lifestyle that I enjoy today. You can't put a number on that.

Dan and I have now been working together for over three years, and I truly believe that if it wasn't for Dan, I wouldn't have the business or the financial freedom that I have achieved to date.

So, you're probably wondering about the results?

Before Dan and The Quantum Leap Program, I struggled to get sales. But within 12 months of starting the program, my business grew by over 550%. Three years down the track, my organisation is fringe 7 figures and my personal income has sky-rocketed. All of this growth was possible because I implemented the program. It's that simple. To this date, I'm achieving steady year-in year-out growth at the 30% mark, while my EBIT now sits at around 45%.

By implementing the investment tactics, financial freedom is now a reality for me. My portfolio includes property (where I have seen growth of around 35% to date), shares (where I'm seeing consistent growth and dividends), and in currency trading (where I'm generating 5 to 8 % per month). Without Dan's wealth principles and guidance, I don't think I would've achieved this.

Not only do I highly recommend Dan Floros as a candidate to help you grow your business, leadership, & wealth, but I fully endorse the Quantum Leap Program and will continue to for as long as I am in business.

Dan, from an acquaintance to a mentor, and now to a life long friend. Thank you for your guidance.

Best regards,

John Englezos
